

# COMPLETE SUCCESS

Begins with NGS Sample QC

Introducing Agilent 4200 TapeStation System

NEW!

## A complete solution for complete success

Quick and reliable sample QC is key to sequencing success. The new Agilent 4200 TapeStation System – a complete solution for true end-to-end sample QC within any NGS workflow. Offering a full range of sizing applications for DNA and RNA.

<b>Automated</b>	walk-away operation with fully automated sample processing
<b>Scalable</b>	analyze any sample number from 1 up to 96 samples at constant cost per sample for the complete portfolio of DNA and RNA assays
<b>Flexible</b>	ready-to-use ScreenTape consumables enable easy switching between assays
<b>Fast</b>	reliable results within 1–2 minutes for a single sample, or less than 90 minutes for 96 samples

And with sensitive detection and zero carryover, you get the utmost confidence in your results, ensuring your NGS workflow is a complete success.
