

NEWS

We have extended our portfolio from GE Healthcare and now offer you sales and service support for AKTA and Biacore in New Zealand.

ÄKTA™ protein purification systems
Biacore™ label-free interaction analysis

MEMO from GE:

Distributor
GE Healthcare

April 27, 2016

Dear Valued Customer,

At GE we are working hard to make it as easy as possible to do business with us. As part of this process we have made some exciting changes in New Zealand to give you easier and greater access to our products, technical, applications and service support.

We are pleased to announce that our existing life sciences consumables channel partner, Global Science, has been appointed as an official authorized distributor for the sales and service support of our AKTA (Automated liquid chromatography (FPLC)) and Biacore (label free interaction analysis) product ranges.

Any existing and outstanding service and warranty contracts will continue to be serviced by GE Life Sciences. Requests for new service contracts and renewals will now be handled by Global Science – our new official GE Life Sciences service distributor for NZ.

As part of our increased focus on New Zealand, we are also expanding our application support team to provide you with even greater access to GE product specialists. Our technical support team will be able to help you with any technical and application related queries. Further details about the new product specialist team will be shared with you shortly.
